Vocational Studies: 2024 Fact Sheet

Programme Title	SAQA ID	Credits	NQF
Certificate: IT Database Development	71850	120	6

***This programme is only available to current students for 2nd/3rd year studies**

Programme description

This is an NQF 6 registered qualification, with SAQA ID 71850, and has 120 Credits. The primary purpose of the qualification is to provide qualifying learners with the advanced skills and knowledge required to undertake advanced tasks and procedures in office technology. In addition, this will significantly enhance the learner's prospects of gaining employment by providing a solid grounding in advanced computer skills required in today's business environment.

Furthermore, the qualification allows students to specialise as big data Analysts. After completing the Big Data Analytics qualification students should be able to gather data from multiple sources and company data warehouses and analyse and interpret the data to extract information that can be beneficial for businesses. They must visualise and report their findings by preparing comprehensive reports, graphs, charts, etc. The content has been designed to ensure that the qualification provides the learner with accessibility to be employed within the IT Industry as a Database Developer, Database Administrator, Microservices Developer, and Data Analyst.

Admission requirements

The entry requirements for Certificate: Information Technology: Database Development are provided below.

- ▶ There is open access to the Qualification. However, it is a prerequisite that learners should have acquired the National Certificate: Systems Development at NQF Level 5. (SAQA ID 48872).

Mode of study | Duration

Day Classes (full time): 12 Months, 131 credits (5 days/week)

Evening Classes (part time): 12 Months, 131 credits (2 x evening classes per week, 18:00 - 21:00, Mon & Wed or Tues & Thurs as well as 2 x Saturday classes per month)

Programme outline

Semester 1 Subjects:

- ▶ TP631: IT Project Management
- ▶ DSD631: Data Solution Development
- ▶ ADP631: Advanced Design Pattern

Semester 2 Subjects:

- ▶ DSD632: Administering Database Infrastructure
- ▶ AD632: Advanced Server Security
- ▶ CSP632: Cybersecurity Professional Practice

Teaching and Learning Methodology

A blended teaching and Learning methodology is followed. All theory classes will be conducted Virtually through Lecturer-led interactive teaching on a national basis. A flipped classroom approach will be followed in some sessions. This means that students are introduced to content at home and practice working through it during the applicable session, either the virtual theory sessions or the practical sessions. All students will be allocated to lecturers that are not necessarily based at the campus of enrollment but who will always be subject matter experts. CTU implements a national academic standard and all lecturers have been appointed on the same criteria and use the same academic content in the teaching and learning process. The adherence to a national academic standard is monitored by the Academic Management team at the Head office. Therefore, all students will continue to receive the same quality of education. Students will attend some practical, group, and research sessions on campus or virtually. The same work and time will be spent on both methods, face to face and VLIT, with students. Extra practical sessions can be booked with the Campus Operational Manager. Students will be expected to attend the practical, group, and research classes on campus a minimum of two days a week, as per the campus schedule.

Textbooks and e-guides

A list of prescribed textbooks will be provided in your e-guides. Students will receive an electronic version of the academic guides (e-guides) for this programme on the Teaching and Learning platform. Access is available to an electronic library of textbooks on O'Reilly, and it is included in the fees.

Technology hardware, software and data requirements

Because CTU is embracing the future of education - education beyond the classroom - it is compulsory for students to have their own laptop with the necessary specifications to speed up their journey to success.

For additional information please consult the CTU Bring your own device guide. [Device Specifications and Stationery List](#)

Student Support

Student support sessions with the facilitator will also take place on a one-on-one basis either virtually or physically at the campus per appointment or per the academic schedule.

Certification

On successful completion and verification by the Quality Assurance Partner of the programme, the student will receive a Certificate: Information Technology: Database Development by the QAP MICT. Note that the process of issuing a Certificate might take up to three years to be finalised.

International certifications

- ▶ AZ-500 Microsoft Azure Security Technologies
- Optional Exams: (*for student's own account)**
- ▶ DP-300 Administering Relational Database on Microsoft Azure

Outcome - Microsoft Certified: Azure Database Administrator Associate

Further studies

Students may pursue further studies at CTU by enrolling for Certificate: Information Technology: Database Administration 71869 NQFL 6.

Career fields

Students can be employed in the following career fields:

- ▶ Database developer
- ▶ Database Administrator
- ▶ Microservices Developer
- ▶ Cyber Security Analyst
- ▶ Data Analyst

Pricing*

Programme	Registration fees	Tuition fee
Cyber Security	R9 000	R85 655

* Excludes external fees and identified textbooks if applicable.

* Prices are subject to annual adjustments.* Prices are subject to annual adjustments.
